To the honorable commissioner of the USPTO.

Sir/Madam

I am writing to you because of the problems I am experiencing with my invention and the examiner who examined it. Sorry to bother you but this is my last resort.

I submitted my application back in 2002, after long wait, I was introduced to Mr Kim Chong W. He was nice in the beginning, He provided me with some advices.

After sometimes, he rejected my claims , saying to rewrite them. I asked him to help me , he said to make a phone appointment. I did, when I called, he changed his mind saying he might lose his job, he then asked me to hire an attorney.

I hired Mr john Gugliotta, who charged me another \$ 1800.00 just to rewrite the claims because mr Chong did not like the claim language.

Mr kim then rejected these claims saying it changed the concept of the idea. Now the attorney is asking for more money, money I don't have and money I am taking out of my kids savings account because mr Kim and the attorney both said my idea is patentable and a great idea.

It's true there are invention like mine BUT they are not identical.

Sir, please look in at the matter, and get me another examiner, because Mr Kim taking it now personal, after the heatyed arguments we both had. This is my dream and my kids dream but I don't want this dream to cost me my savings.

You can reach me by mail or by phone at 407-222-8770.I trust you are going to try to help me as I don't have any more alternatives.

Yours truly,

Abdelkhalek Elhadiri
